

**UNITED STATES GOVERNMENT FACES RISK OF LOSS OF  
ALL WORLD'S TRUST BECAUSE BILL GATES IS A  
DEMENTED EVIL MURDEROUS CRIMINAL**

ZULFIKAR MOINUDDIN AHMED

I was looking at the Stanford Philosophy entry for "trust". It is quite nice and clear. Trust involves being able to depend on some party for something that we value. I will tell you right now that I depended on US Government for securing my Natural Rights, and they have earned my distrust because Bill Gates brutally assaulted my eye and invaded my Deep Interior and US Government was confused. The US Government is extremely unwise because I am American with USCIS# 046-077-179 and all Americans will totally distrust the US Government after this because all Americans have various levels of trust that the US Government will secure their Natural Rights. When they took the side of the murderous evil savage destructive criminal Bill Gates rather than immediately intervene to secure my Natural Rights I, being a law abiding American with my entire life since 1987 being spent in America, I felt strong sense of betrayal.

But I want to write here about more than personal issues. I will destroy the trust of the entire world for the US Government because Natural Rights security is their Constitutionally mandated duty and they are an illegitimate organisation the moment they even have any doubts about what to do when a murderous criminal breaches blood meta and deep interior of an American with explicit agenda to sabotage the US Declaration of Independence with racial slurs and repeated mantra of "Natural Rights are claptrap". When this happens, the entire world must make the rational decision to distrust the United States Government, because the Government is clearly not functioning for the well-being of the American People let alone the well-being of the Human Race. Then it is the duty of United Nations Security Council to ensure that the world is not endangered by the stockpile of weapons of mass destruction controlled by the US Government.

In this case the major problem is that US Government was aware that Bill Gates was a murderous criminal for decades but did not kill him. So he will ensure that all organisations will lose their trust by all people eventually. That's the catastrophic loss of trust, when people and organisations are in any alliance with someone so evil and horrible, it is rational for people to distance themselves immediately and distrust them. That is human nature, because trust is risky always, and it is not just irrational to distrust the malevolent evil murderous criminal such as Bill Gates but once his evil is made public, all institutions associated with him.
