

**LOW LEVEL INCOMPETENCE AND LACK OF  
COORDINATION OF UNITED STATES GOVERNMENT PUTS  
MY LIFE IN GRAVE DANGER**

ZULFIKAR MOINUDDIN AHMED

Local government workers in Dallas, Jasmine and Mike, are nice people, but they are still focused on my psychiatric drugs as the most significant problem they are solving. They are still operating under the assumption that it is the best thing they can do and that my views about the dangers of Bill Gates are *hallucinatory*.

These put my life in extremely grave danger. I would like the world to hold United States Government responsible for my death which is quite high because Bill Gates is a habitual murderer by illicit use of power.

I am 100% sure that psychiatric drugs are mostly irrelevant and my life is in severe danger for destructive invasion of Bill Gates in my deep interior with the intent to harm, destroy and murder me. Asia is aware, and so are higher level FBI operatives but the local government workers are not, and I will consider their rather erroneous working hypotheses about what is necessary and valid will put my life in grave danger.

I want Stanford, Harvard and Yale Law Schools to be aware of this as I would like to pursue litigation against the United States Government. I am American. My Permanent Resident ID is USCIS# 046-077-179, expiring 2031.

I am seeking tenure at Stanford University, and have been successful in my efforts at Four-Sphere Theory.

I just learned that Bill Gates is actually being considered for execution finally by special parts of FBI. That is fine and good, as he is a grave threat to the American People and I paid a very great price for not knowing that his is a habitual murderer who believes that he has a right to kill people for being "big" and "white" and does so quite often with assistance from elements of United States Government.

But my health is not good enough to withstand local government mishandling. These government workers are following the wrong track. They are more worried about ensuring that I am constantly under surveillance and on irrelevant focus on psychiatric drugs that about the dangers posed by and the harm done in power by Bill Gates. My body and health is not robust enough to handle this.

If I should perish then I want United States Government to be litigated with \$1.5 trillion in penalty for reckless endangerment of my life, political repression by frivolous denial of my natural rights of Life and Liberty, and following the wrong remedy by continual assumption that I was having psychiatric issues such as mania or delusion or hallucinations while I was severely and brutally assaulted by white power, US War Power, US Industrial Power, and Thirteenth Century Black Magic by Bill Gates.
