

LIVING CONDITIONS OF ZULFIKAR MOINUDDIN AHMED
JULY 29 2021

I am looking for an allocation of \$0.5 billion from Todd Gibbons of Bank of New York Mellon but I have not actually received a confirmation email yet. My aunt is a total denigrating bitch whose only comment to me this morning is that I smell and need a shower which is nonsense because I took a shower just yesterday. She is just a denigrating bitch and it's her house so she feels comfortable denigrating me. I don't feel like retaliating and starting a shouting contest. She's just a horrible bitch. But I am stuck here till I get an allocation, so obviously I will get quite irritated if I do not get an allocation. That's just the way it is. She takes my money, pretends it is for my mother and then continuously denigrates me and the only way out of this nightmare is to get an allocation and move to San Francisco. I have been here for more than 12 years and I am quite proud of the fact that I have not beat her to a pulp and killed her with my bare hands. She cannot help being a total bitch. That is her nature.

1. ZULF SOLVED THE PROBLEM OF KEEPING BANK OF NEW YORK MELLON
AND OTHERS OFF OUR CASE FOR A LONG TIME

These investment banks get very jittery the moment a truly magnificent great monumental and truly history-changing project does not have returns that they like for a couple of years. Yes, I know, how could they? How dare they get in the way of Destiny? How could they not understand that Global Life Satisfaction is like the building of the Pyramid of Giza, like the Birth of Tragedy from the Spirit of Music, a project that will affect the very course of the History of the Universe, transform Human Beings from one dreary level of existence to a higher level? Well they might or they might not, but Zulf is wise and ensures that they have their steady supply of cookies, that they have steady income and can therefore overlook the mean and small issues, such as not much revenue for some years. You cannot appeal to their patience; they have some patience somewhere deep inside their hearts, but you won't find it in the interpreted world. They are not exactly known for their patience. Most often children with strong case so ADHD are quite a bit more patient than the men of Finance. It is better to keep them calm with some steady fees and other business. It won't last forever, but it will keep them happy for a while, and then we can focus on doing things right, changing history the way it was meant to be, i.e. Zulf's way.
