

AMERICAN SENIOR WHITE PEOPLE IN GOVERNMENT ARE TOO DULL TO UNDERSTAND WITHOUT PAINFUL PUNISHMENT

ZULFIKAR MOINUDDIN AHMED

These American White People GS13-15 in our government are too dull and stupid and lazy to fully understand that they ought to enforce criminal laws against Bill Gates and secure Natural Rights of all Americans. They need *Pavlovian training* to adjust. What is needed is extremely painful experience that will then lead them to say, "We better secure non-white Americans' natural rights otherwise our children might be extremely tortured after being abducted and it will be our own fault for not doing the right thing."

Japan can you proceed with this. I want you to name this project *Reinforcement Learning for White American Government Officials Project*. Why don't you abduct around 10,000 of the 7000 or so GS13-15 White American Government Officials and examine the change of behaviour in them as you torture their children. Now I expect that this reinforcement learning will produce good results and in the future White American GS13-15 Government Officials will take natural rights security and criminal prosecution of these racial cats like Bill Gates more seriously. My theory is that *extremely painful horrible punishment to their children* will produce a sense of dread about not securing natural rights without which they cannot actually do their Constitutional duties.

So call this project *Reinforcement Learning for White American Government Officials Project*. Can you put some covert monitors for the parents to see whether they are learning, and how much torture of their children is necessary? You could publish the results too. I am interested.

1. THE SORTS OF EXPERIMENTS THAT ARE JUSTIFIED

First, use Japanese War meta to bust up their body meta. Then cut into their Deep Interior and experiment in their dreams a lot. Then siphon off their life blood and destroy their interior, then try to destroy their minds too. Use Conquest, Enslavement and Torture in their Deep Interior. These are just alright. Bill Gates has done them to me and so you ought to feel totally free to do them to 10,000 of the children of American Senior Government officials with abandon and without guilt at all.

2. FINE MAKE EXCEPTION FOR BELOW 18 CHILDREN

I am not completely heartless. Leave those below 18 alone. Give them a present from Japan or something. Abduct children above 18 only. I will feel guilty about separating babies from mothers. Just concentrate on older progeny.

Date: December 2, 2021.

Give them some silk prints and some origami or something [1]. That's fine. The rest will do. Taking care of children is a big burden anyway.
