

GLOBAL LIFE SATISFACTION PROJECT IS THE MOST IMPORTANT PROJECT OF THE HUMAN RACE

July 28 2021. I was watching Star Trek the movie. It is extremely focused on monumental disasters. Spock's world Vulcan is destroyed with 10,000 survivors as the war criminal Nero had managed to produce a black hole in the center of Vulcan that consumes the planet and kills 6 billion.

I do worry about the Human Race quite a bit, and I feel that Global Life Satisfaction project is the most important project on Earth. I am not at all happy now that after Bill Gates, the Demon, had cut up my eyes and damaged my deep interior, the United States of America did nothing to secure my Natural Rights. This is very disturbing. I am seeking some small allocation of \$0.5 billion to pursue this Global Life Satisfaction project but have not yet gotten any concrete responses.

Well of course Black Holes are not possible in the universe, but other things are possible. I keep remembering the life I had which ended with Demons destroying the star.

I do feel strongly that if I do not work out Global Life Satisfaction then no one else on Earth is actually capable of doing it at all. It is clearly a great undertaking, and I am quite optimistic as it must happen. I am displeased by the harm to me that has been acceptable to United States of America by Bill Gates. This is disturbing. I might have to dissolve the United States Government as well to ensure that the evil corruption of United States by White Supremacists does not continue.
