

BILL GATES IS TOO INFERIOR TO BE MY SLAVE

ZULFIKAR MOINUDDIN AHMED

I am heterosexual, so I don't want a man as a *sex slave*. So he's no good for that. How about rubber plantation? He does not seem all that robust to work in rubber plantations. No, no, doesn't look like he can pick cotton. He does not actually look all that worthwhile on any physical labour at all. Let's see. What's he good for? He does not have any college education. I could use a slave with profound erudition but he's a stupid college dropout. Now I am not exactly in the market for any slave these days, but *why in heaven's name would I pay money for Bill Gates? He's totally worthless*. He's too inferior to be a slave to me.

1. YOU ARE HARMING MY HEALTH AND LIFE

Bill Gates you are harming my Health And Life with illegitimate enslavement efforts but there are no 'master races' and no 'slave races'. This was a delusional theory that is false. I don't know who came up with it. There is no evidence for this. The human race is a single race; for that the genetic evidence is strong.

Now since the end of the second world war, slavery was strongly outlawed in international law and is a crime against humanity in national law. So what will you do after you enslave me exactly? You can't sell me at all. And besides, I thought you thought you were a big shot. Slave trader is pretty menial Bill Gates. Those guys went over to Africa and other places and did pretty gruesome work and ship over kidnapped people to other ports for sale. So after 66 years of life on Earth, this is what you amounted to? Enslavement and carrying around jars of feces in public? And you think you are superior to me? I guess stranger things are imaginable.

2. I AM FAR SUPERIOR SCIENTIST THAN ALL RACIAL THEORISTS

I see your confusion. You see, Bill Gates, all racial theorists of the entire history of human race – in Austria, in Germany, in India and China, in Israel – I am strictly superior to them all as a scientific genius. I have eclipsed their theories with showing universal human moral nature empirically, and so now all of those 'master races' and 'slave races' I have eviscerated into oblivion. They are now irrelevant fictions. I did not realise that you did not know that.
