

## HOW THE BROWN MAN CIVILISED THE WHITE MAN

ZULFIKAR MOINUDDIN AHMED

The actual history of Civilisation is a little confused in the West. The actual story of Human History is that the Brown Man created Civilisation in the Fertile Crescent, in Sumeria and Mesopotamia, and then in Egypt, and then Agriculture spread northwest from Anatolia to Greece and eventually we had Hellenistic Greeks after Myceneans and then from then the White Man gained Civilisation.

It was just ignorance of history even from Renaissance onward that did not understand that Hellenistic Greece and Ancient Rome were strongly derivative Civilisations, and the entire Western Civilisation that grew afterward were really young children of Brown Man's invention of Civilisation.

I am quite fond of English and Scandinavian and French and German and Italian and Spanish Civilisations, but let's not be confused. It was Brown Man that Civilised the White Man and not the other way around.
