

## ASIA CAN YOU HANDLE A GOOD OPTION FOR ME IN TOKYO OR HONG KONG OR LONDON?

ZULFIKAR MOINUDDIN AHMED

I am American. I immigrated in 1987, have Permanent Residency from 1997. But I have achieved my American Dream here. I have earned \$620 million. But for whatever reason American White People do not want me to have the rewards of a productive American Life at all. I have a criminal man, Bill Gates, destroying my Life.

Can Asia offer me with the urban cosmopolitan situation with a great pad, in a liberal professional setting in Tokyo or Hong Kong or even London. Get me a penthouse loft, and get me easy ability to form some companies as I would in San Francisco.

Bill Gates has sabotaged my earnings and American Government is too racially biased to hold him accountable for his crimes.

I have finance experience and good projects to do. Get me good staff of high caliber too. I will still prefer to just get my money and move to San Francisco for life but I guess I need options.

### 1. AMERICAN DREAM

I did believe in the American Dream. I moved to America at 13 and I followed it, working after Princeton at Lehman in 1995, had a string of senior jobs, worked hard. From 2008 I worked without any compensation for decades. I worked on theoretical physics, took disability income which is miniscule and bought five hundred books to compensate for my library of thousands of books I abandones in 2008. I studied and worked on Finance problems too. Then D. E. Shaw & Co. found my work and put on trade some \$6 billion. They owed me \$120 million. That's around a year ago. So I made it in America. I wanted to celebrate, get a good pad, get a beautiful lover, settle in San Francisco, enjoy the fruits of my labour and productivity.

But I am learning that American Dream is not easy for non-white people. Totally unexpected obstructions popped up. It turned out that Bill Gates and others do not want non-white people enjoying success.

I don't know what American Government White People want to do, but if I do relocate to Asia, I will tell them my story, that America lies about American Dream for Asian immigrants. It's my experience so you can deal with it then.

### 2. AMERICAN GOVERNMENT WHY DIDN'T YOU JUST TELL US 34 YEARS AGO?

My mother struggled to move to America and bring myself and my brother to this country. We lived in horrible conditions much worse than in Bengal for years and I studied in high school, and then went to Princeton in 1991. I believed in

the American Dream and worked for years for success. For 34 years I believed in this country, in Natural Rights Security, in American Dream. Why didn't you just tell us that these are lies 34 years ago? What was the point of hiding this? You are racially biased and only want white Americans fruits of their labour and hard work and you allow racial men like Bill Gates destroy the lives of non-whites who succeed. I could have gone to England where this does not happen. I could have stayed in Asia. I am not happy about this.
