

## DRAFT OF OPEN LETTER TO FEDERAL BUREAU OF INVESTIGATIONS JANUARY 19 2022 5:38 PM

ZULFIKAR MOINUDDIN AHMED

### 1. THE PURPOSE OF THIS DOCUMENT

An FBI Officer, a Allen Texas police officer, and two health workers stormed my peaceful existence on January 7 2022. The FBI officer accused me of having criminal intent and passed me on to mental health incarceration for a week, between January 12 2022 and January 19 2022. The photograph below, taken in the afternoon (roughly 2:00 PM) of January 19 2022 is myself with a Texoma Medical Center official, Jared, who dropped me off.

The purposes of this open letter to FBI are:

- to ensure that the reader understands clearly that my Natural Rights of Liberty and pursuit of Happiness were disrupted by FBI
- to promote my Natural Rights World Order movement
- to ensure that United States Government is disallowed from violating Natural Rights of myself or other Americans in the future

The letter has the subtle purpose of simultaneously showing that the charges brought against me are (a) frivolous, (b) absurd, and (c) incredible and unrealistic, and to gain credibility among international lawyers and diplomats to pursue stronger oversight of the United States Government from arbitrary exercise of power against vulnerable people in repression of Natural Rights guaranteed by the US Declaration of Independence as well as UN Universal Declaration of Human Rights of 1948, i.e. fundamental national and international laws. And furthermore to secure a *Natural Rights World Order* with stricter accountability by Federal Government of the United States in a world order based on *Universal Security of Natural Rights without exception globally*.

These are not new concerns of mine, and they fulfill a lifetime's concerns that are central to my political convictions as well as examination of what is best for my beloved people the Human Race.

---

*Date:* January 19, 2022.

## 2. OPENING SALVO

Let me share with you the poster that I had made that was used by the FBI to threaten me with criminal charges with the assurances that the judge would support them.

I will explain the meaning of this to you in my own words and let FBI and judges backing them explain their reasoning as I do not understand their reasoning.

First you need to know some things about me. I was shot at 11 accidentally by a school-mate in Bengal. The pellet is still in my liver. I was, ever since, quite apprehensive about guns. I never owned any guns and never even practiced shooting firearms. I expected FBI to know this, since they had been tracking me for some years now.

Second, you need to know that I consider the poster to be extremely humorous, because it is harmless. I knew throughout my life that only the *state* has right to take lives under extraordinary conditions, and was well aware that I did not possess such a right. I am educated at Princeton, and this knowledge was quite well-ingrained in me from my high school years.

Bill Gates is an individual who lives literally **2100 miles** from Allen Texas, and has the benefit of \$131 billion in private wealth for his security. I consider it not particularly intelligent a deduction that someone who makes a frivolous and humorous poster not inciting anyone else but myself to do something that is impossible to do even if Bill Gates lived a block over from me in Allen Texas.

### 3. THE SUBSTANTIAL ISSUES

I am far too educated about the history of repression around the world to claim that my seven days of loss of Liberty is a major event in the struggle for Natural Rights Security for all people of Earth. In Bengal, just to give you an example, one of our great poets, Kazi Nazrul Islam, spent a great deal of time in prison during British India. This is part of my cultural heritage, and I am besides being a great devotee of Rainer Maria Rilke and Thomas Stearns Eliot, better known to Americans, am also a great devotee of Kazi Nazrul Islam.

I will share with you one of his great songs [1].

I consider him to be a Modernist from roughly the same period as Eliot and Rilke. This particular song is written from a British incarceration of Kazi Nazrul Islam – for political repression as well.

The translation is due to Sajed Kamal.

Destroy those iron gates of prison,

demolish the blood-stained stony altars of chain worshipping!  
 O youthful Shiva,  
 blow your horn of universal cataclysm!  
 Let the flag of destruction  
 rise amidst the rubble of prison walls of the East!!  
 Play the music of the festival of Shiva!  
 Who's the master? Who's the king?  
 Who is it  
 that punishes the truth of freedom?  
 Ha! Ha! Ha! It's a laugh—  
 God is to be hanged?  
 Rumor-monger—  
 who teaches this pitiful "trugh"?  
 O you forgetful Madman —  
 shake — shake the prisons  
 with your forceful cataclysmic pulls!  
 Send your Haidari call,  
 play your war-drums—  
 call Death  
 towards Life!  
 There, the Baishakhi storm is dancing—  
 are you just going to sit through your days?  
 Let's see  
 you shake up the foundation  
 of that terrible prison.  
 Kick - break the locks!  
 All those prisons—  
 set them on fire,  
 burn them down, uproot them forever!

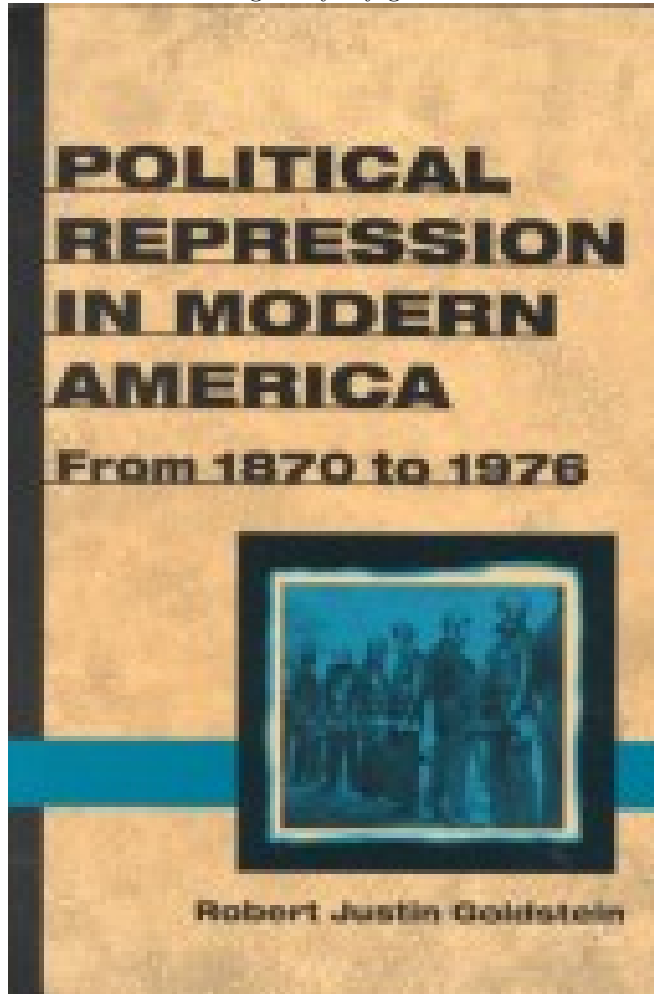

But he was neither the first nor the last to have lost his liberty for political repression. Better known in America are Martin Luther King, Jr. and Nelson Mandela. Then the political dissidents of Soviet Union. In this long war, my incarceration is minor, however, it is still significant for American standards, and enough to cite as significant to my own American Life.

#### 4. I AM NOT INTERESTED IN FBI BUT UNITED STATES GOVERNMENT

I wish to be very clear that the *substantial issue* here is not any small failure of the FBI, which is one small arm of the Federal Government of United States but a much broader issue of the *relationship between Universal Natural Rights and the United States Government*. This is crucial as a distinction to make here. I do not perceive here the fault of FBI, or any of the other three letter acronyms for various sub-organisations of the United States Federal Government, but the *whole Federal United States Government* and its policies regarding Universal Natural Rights generally.

I have with me the book of Robert Justin Goldstein's *Political Repression in Modern America, 1870-1976* which is a scholarly study of history of political repression within United States [2]. But I will add also the brutal lack of concern for Natural Rights abroad as  $N(\mu = 11,200, \sigma = 223)$  people have been murdered

in the Middle East by United States forces since 9/11 on frivolous considerations by use of mechanical drones. These are some of the substantial political issues of Universal Natural Rights today. And my aim is to end this intolerable devaluation of Universal Natural Rights by my government in the future.

##### 5. DEAR FBI

Dear FBI,

I have been denied my natural rights of Liberty and also pursuit of Happiness for the period January 12-19 2022. Just so that we are clear on this: you, the representatives of and officials of Law Enforcement arm of our United States Government, used absurd frivolous unrealistic accusations about how my 'threat' to whack Bill Gates using nonexistent sniper rifles from 2100 miles from his physical location to deny my Constitutionally protected rights not for an hour but for an *entire week*,

- disrupting my plans to do more Ph.D. Analysis Exams for Stanford Mathematics necessary for pursuit of my American Dream

- Disallowing my use of my favourite Cross silver pen whih was lost in the melee and reduced to using limpid felt tip pens without the inspiration of the Muses
- Humiliating me right in front of my aunt and my younger brother by telling them that I would be imprisoned for criminal acts—putting my mother in further distress after suicide of my sister in 2017

have hurt my life substantially and not superficially.
