

I'LL GIVE YOU SOME SUGGESTIONS

ZULFIKAR MOINUDDIN AHMED

I want John Roberts, Anthony Blinken, Lloyd Austin and Merrick Garland to have a public face-to-face with some staff. We'll call it the *National Government Summit For Republic Improvement*.

The agenda will be how to deal with NSC-68 structures. John Roberts, representing Judicial Branch independent power can declare NSC-68 structures Unconstitutional. Then this will be an order to Anthony Blinken and also Lloyd Austin to begin restructuring the Executive Branch international-facing Departments, i.e. Department of Defense and State. Then you can restructure all NSC-68 provisions to a new structure with the conditions:

- The new structures will be in conformance with United Nations international law
- The new structures will be completely under democratic control
- There can be no private corporate dealings with the Defense Department without both Legislative and Judicial officials sign-off

Good luck gentlemen, and may the Light be with you.

1. REVIVE THE GREAT TRADITION OF AMERICA'S FOUNDERS

America has been badly damaged by NSC-68 institutions. You should organise several weeks of meetings. You should choose great location with good lighting and good seating, audience.

Invite:

- The Press, NPR, NBC, CNN, NYTimes, etc.
- Top academics on International Law and Relationships, Constitutional Law
- Embassies of Eurasian powers and other national representatives
- Others who can provide wisdom

Give the matters their due time. We have to revive the spirit that founded a vibrant enlightened classical liberal democratic republic. Make space for larger staff and bring larger staff so that deliberations and presentations can take their time.

The American people want to trust the government and we will do this when we see serious purpose and transparency. We don't want soundbites. We want great history of serious enlightened people dedicated to making our lives and all of humanity's better.

Sincerely,

Zulfikar Moinuddin Ahmed
