

# EXAMINATION OF LOUIS TAY AND ED DIENER'S BEAUTIFUL 2011 WORK ON WORLD WELL-BEING

ZULFIKAR MOINUDDIN AHMED

## 1. MOTIVATION

I have severe health problems today, June 26 2021. I woke up with a very sharp pain in my gastrocnemius, the muscle on the back of my right leg from back of the knee down to the ankle. I did not even know it was called 'gastrocnemius' until I looked it up. Now I am on disability money, so I don't have enough money to do what I want to do, which is move to San Francisco in a good pad of my own and expand Thyself Inc. But I have enough money for food, and I am living with my aunt who is a total bitch who abuses me every day. But I don't go hungry. I am extremely murderously upset about Bill Gates who blocked my legitimate earning from D. E. Shaw & Co. It's \$120 million and it really is well-earned. I worked for years on getting deeper insights about movements in liquid markets and found pure arbitrage. D. E. Shaw & Co. want to give me my money but Bill Gates intervened in Finance professional business because he has a racial agenda. He broke Commerce Laws to do this; he violated Finance Industry conventions, and he cut up my eyes instead of paying my legitimate due, my money, \$120 million, and I am living in the United States of America which is a Multi-Ethnic Classical Liberal Democratic Republic and the goddam US Government cannot do anything about my livelihood! That is just outrageous. I have been writing about how Bill Gates is a totally unlawful criminal cunt who disregards all US Law all the time and the goddam US Government, totally incompetent, has not bombed all his assets and obliterated his body two decades ago. My mother is sick in Bengal, my family is waiting for me to get income for them, and US Government cannot get rid of a fucking measly criminal so I can get my income. I am absolutely outraged beyond description at the moment. But my Life Satisfaction is 7-8; it's not 3-4 right now. And the fundamental reason is achievement of immortal genius with Four-Sphere Theory's success.

In this note I will examine the results of the famous Louis Tay-Ed Diener paper [1] of June 20 2011 just a bit more than a decade ago. It is a very important paper because it allows us quantitative insights about global Life Satisfaction.

This note aims to just examine the actual numbers and attempt an interpretation of them. The great question on our minds is to understand predictive models for life satisfaction.

## 2. THE NUMBERS

Correlations of Life Satisfaction are here.

---

*Date:* June 26, 2021.

	var	val
1	Basic	0.31
2	Safety	0.08
3	Social	0.18
4	Respect	0.11
5	Mastery	0.15
6	Autonomy	0.12

Let us get acquainted with these numbers by simplification here. Let's remove the fine tuning and just make the assumption that basic is twice as important as the other listed factors but the latter are the same.

A random person from human race will need all of these with basics twice as important as others. Therefore assistance to them for life satisfaction ought to include specific recommendations for these six areas.
