

OH MY QUEEN ELIZABETH IS THAT \$3.2T GDP SO NICE FOR PERPETUAL PAYMENTS TO BENGAL

ZULFIKAR MOINUDDIN AHMED

So, Your Highness, Queen Elizabeth, I see England has a GDP of \$3.2 trillion. That's so nice. That's such a nice juicy amount. We don't want most of it to go to Bengal for breaking all sorts of treaties, now do we? So why don't you avoid that unpleasant situation and just offer me Special Agent 006 position with my tiny \$620 million in *Zulf's Piggy Bank (Do Not Touch)* really really soon before all of Asia is up and arms about English meta used in my Deep Interior by Bill Gates?

Don't you think a good English Monarch would choose to do the right sort of thing and protect England's largesse going to Bengal for perpetuity?

1. SOMETIMES TRAGIC MISUNDERSTANDINGS DO HAPPEN ENGLAND

Sometimes tragic misunderstandings do happen, and those sometimes do lead to a nontrivial percentage of GDP of a nation just being hemorrhaged and going to another nation because no one explains to them that the crime was not the nation's. Now look, Your Majesty, Zulf is such a busy man. I am looking at the intimate partner violence problem and others. Such a busy man. If I don't have several properties and a secured bank account in Bank of England and employment as Special Agent 006 for England, how will I justify spending all the effort to explain to all of Asia that I love England and I know that it wasn't England but Bill Gates who is really responsible for the awful dreadful criminal presence of English meta in my Deep Interior? You understand how sometimes mutual misunderstandings happen, don't you?

2. FINE I'LL TELL ENGLAND SOME AMBITIONS

You see, MongoDB is an English company and Meteor is an American effort. I have big plans for 8 billion people services. I want England to buy me the 20,400 square feet space in Albion and 16th and a Penthouse loft in San Francisco immediately. I will tell you more after I have all of this and money ready for me by English effort.

The warehouse I want purchased is this [1]. I'll get several thousand servers with Meteor-MongoDB service for 8 billion in web-mobile with it. Then I will show you how human race services are done without Cloud.

3. ENGLAND I HAVE BEEN FINANCE NOT IN SALES SINCE 1995

In Finance outside sales we are quite open about what we do often. We say "we'll extort you" and "we'll rip your faces off" and other straightforward language. It's actually better that way. Sales always felt a bit on the not so honest side to me.

Date: November 29, 2021.

4. I WILL BE A THOUSAND TIMES MORE SUCCESSFUL THAN THE ILLITERATE CHARLATAN BILL GATES

My Medium Frequency at D. E. Shaw makes more money more rapidly than Microsoft ever did. My technology ideas are far superior. I don't lie all the time and pretend that my favourite books are things I have never read. I have infinitely better strategic sense with Finance professional experience. I am not Bill Gates level. I am far superior in a much better league. Who is this Bill Gates kidding? He does not even know good code from bad code and he wants to compete with someone who actually got paid to do backend code for a document management effort in New York. Who does he think he is?

5. ENGLAND I NEED AN ADDITIONAL FAVOUR

Is it possible for England to buy up full page ad in Financial Times, New York Times, New Yorker, Economist, and Boston Globe with the following image?

ZULF VOWS TO CHANNEL ALL DESTRUCTIVE RAGE AGAINST BILL GATES AND DESTROY AND KILL AND ANNIHILATE HIM FROM EXISTENCE

ZULFIKAR MOINUDDIN AHMED

I, Zulfikar Moinuddin Ahmed, want to vow to reserve all my destructive rage, all my wrath, all my anger, all my murderous feelings away from my aunt and others and only towards totally wiping Bill Gates from existence, towards erasing his legacy, towards destroying him physically and in every other way, and repeatedly renew my faith that I must destroy, kill, murder, and eviscerate Bill Gates above all. I rejuvenate my faith that he deserves this more than anyone else.

Of course I will do these things without violating United States law or International Law.

I think this has great benefit for my future success. And it is true and honest too. That is very very good strategy in my view.
