

A SIMPLIFIED SCENARIO FOR SANDY WEIL'S MORAL REASONING CLASS

ZULFIKAR MOINUDDIN AHMED

Dear Professor Sandy Weil,

Your Moral Reasoning class at Harvard is quite popular. I will give you a simplified scenario that is extracted from real life. You see I write up some of these notes so posterity is able to have some record from me on the Life and Times of Zulfiar Moinuddin Ahmed, the greatest immortal genius in history of humanity and so on.

The scenario is that around a year ago, October 2020, Bill Gates intervenes when D. E. Shaw is trading my Medium Frequency Strategy based on some years of work and I arrange \$6 bn in total for them. Right now \$2 bn from Bill Gates and \$4 bn from India. They owe me \$120 mn but Bill Gates tells them that he will instead destroy and murder me and take all my ideas and work and disseminate it among white people and test his enslavement of Asian ideas on me.

Now US Government learns of this quickly afterward. Different confused groups, and nothing happens. Bill Gates repeatedly confesses his interest and continues to consider me for harm by his powers, and US Government tells him to 'kindly go' and he repeatedly says he won't and every night Bill Gates experiments on my dreams and I don't have restful REM sleep at all. He began with using US War Meta to breach my body meta which was forbidden by Geneva Conventions.

Days go by and I don't get my income of \$620 in the end because Madam Christine Lagarde gifted me \$500 mn. Bill Gates explains his plan of destroying my life by heavy meta and that he has a lot of experience doing these to induce suicide and US Government knows all this and does not do much.

My US Papers are USCIS# 046-077-179 and issued in 1997 expires in 2031, so there are no problems with my American status.

The interesting question is what is the justification that US Government can use given that the state is founded on US Declaration Preamble that says the state exists to secure Natural Rights as its primary purpose.
