

ZULF'S ANALYSIS OF THE PHENOMENA OF 'KIKES'

ZULFIKAR MOINUDDIN AHMED

At the moment, convention has it that 'kike' is an unsavory hateful characterisation of Jewish people by antisemites. This is a travesty, for the use is actually quite valuable, and the problem is its association with those of Jewish faith.

Let us disentangle how a valuable word was botched by the European Christians. A 'kike' is a predatory being in meta, and one who attempts to capture and enslave and siphon blood energy of a victim, like a vampyre in a sense.

Now let's consider my Universal Human Moral Nature hypothesis, where the null hypothesis is that human moral natures actually strongly concentrated with exponential decays from a 'good' pole; the human race is an Angelic Race, and we would expect 'kikes' to occur at very rare tail events.

Since Jewish people are smaller population than others such as all Asians (who are not Jewish) or all Christians, the likelihood of a Jewish person being a kike is actually lower than those larger populations producing one. I won't elaborate this simple points.

To make things clear: Kikes are specific forms of morally degenerate humans and Jewish population are a sample from the Human Race, the identification of Kikes and Jewish population is a rational error.

Antisemites who identify Jewish people with kikes may or may not be hateful but they are certainly ignorant morons. Kikes are extremely rare by my examination of statistics of human morals.

Now religious laws, Judaism, Islam, and Christianity would forbid most of the elements of a kike anyway. So my guess is that in Europe political weakness of Jewish people in some centuries had created conditions where this morally depraved state of 'kikehood' could be identified in plebian opinion with Jewishness. It is obviously denigrating. I am not a kike, for example, and I would be quite irritated if people accused me of being one. Likewise being a kike is against Jewish sacred law, i.e. it's not kosher, so Jewish people ought to be outraged at being accused of being a kike. I will defend any Jewish man who is accused of being a kike. Well not physically because I'm only 5 foot 8 inches and not exactly intimidating, but in other ways.

I implore people to not use this word lightly. It's valuable when there are actual kikes involved. This has nothing to do with Jewishness etc. Reserve it for when someone is a kike.
