

ZULF'S FEBRUARY 15 2022 5:09 PM RUMINATION ON SCIENTIFIC PHILOSOPHY

ZULFIKAR MOINUDDIN AHMED
ZULFIKAR.AHMED@GMAIL.COM

I truly enjoy thinking about philosophical issues, and find it pleasant and joyful to read Imre Lakatos and Paul K. Feyerabend's writings. I am a Scientific Revolutionary. But I am also concerned with Truth in a broader way than science. I am a Romantic as well. It is not satisfying for me to only seek a unified Mathematical Physics. My four-sphere theory is successful as the Eternal Truth of Macroscopic Physics. That is one side of Truth, that of Nature. The other side is Man. This division is from the Romantic Era, that between Man and Nature. And my Life is threatened now, by a nefarious evil charlatan villain named *Bill Gates*, a thoroughly disgusting fellow who found a permissive government in a primitive time in a nation called *United States of America*. My readers might be reading this in 2200 AD when this mythical organisation has sunk into oblivion for their errors, and you might ask yourself, how did an entire continent sink into oblivion? You might be confused between mythical sunk Continent of Atlantis and the mythical sunk Continent of America. Well, don't worry too much about those things.

It so happened that I was quite interested in investing my fleeting life on matters of knowledge of Man as well as Nature. I came across the work of Martin Seligman, the Positive Psychologist, several years ago. Let me show you his tome over here.

I became quite interested in the work of Martin Seligman several years ago, after first gaining some familiarity with the Five Factor model of personality traits, which I think is a tremendous breakthrough in individual personality. Then after I had established empirical validity of Aristotle's Virtue-Eudaimonia theory, I examined and found the Virtues of Romantic Love.

Mathematical Physics examines Nature in a schematic manner, and with a complete theory of Physics obviously one would like to have a clear understanding of Man. The key thing on my mind was that they ought to be *seamless and coherent*. There is tremendous potential in Psychology as a Science, and with Macroscopic Physics reaching satisfactory completion with my four-sphere theory, this contemplation seems much more urgent. I proposed Quantitative Human Nature and Quantitative Positive Psychology as new areas for development. Madam Christine Lagarde liked it and was willing to gift me \$500 million to develop them in San Francisco. That was many months ago. Alas, this miserable wretched Bill Gates, who ought to have been totally destroyed before he got a chance to sabotage my life by the United States Government, found some illegitimate way of blockading efforts of European Central Bank. But my ideas are obviously still potent and good, as you might expect, for I, Zulfikar Moinuddin Ahmed am an *immortal genius* and so I am obviously going to produce potent good and world-changing ideas. Those are the sorts of things that immortal geniuses usually do, and why would I be the first immortal genius to disappoint my beloved people the human race? Obviously I wouldn't.

1. THAT'S LAUGHABLE BILL GATES THINKS HE IS HIGHER THAN ME

Bill Gates, I don't respect you. You are lower than me. I do not believe that you are even in possession of the intellect of Alvin the Chipmunk and your moral level is worse than Mumm-Ra The Everlasting. In what world will I think you are higher than me? I am superior to you plain and simple. The Human Race is a single race. Your podunk hick ideas about white superiority are laughable Bill Gates. You're an evil dirty disgusting achievementless little cunt. No one will agree with your self-decided narcissistic Emperor-of-the-World. This is a Multi-Ethnic Classical Liberal Democratic Republic. You and I were *created equal* but your sordid low moral virtues makes you *strictly inferior to me*. I did not make you inferior. You did it to yourself.
