

ZULF HAS TO RESOLVE THE GREAT PROBLEM OF UBIQUITOUS RACIAL PREJUDICES OF THE AGE

ZULFIKAR MOINUDDIN AHMED

There are *ubiquitous racial prejudices of the Age*. They are elements of the Spirit of the Age. I faced them from graduate school days when, for example, Daniel Stroock was not so enthusiastic about my mathematical abilities. But I was fortunate then because I was not aware of any racial prejudices at all. But now I am fortunate again, because the sorts of prejudices Dan Stroock has, that Jewish people are more talented in Mathematics than others, this sort of thing, is part of the norm of the age. He is not exceptional, Daniel Stroock. And a man is unwise to challenge the Spirit of the Age on small sample experience which I had because I was introverted.

I am unfortunate now because *Bill Gates* is attempting to destroy me, and unlike Daniel Stroock who does have genius in Mathematics, Bill Gates has absolutely no genius in Mathematics or anything else. He is just *pure racial prejudice* without substance and that is good for my sort of cat. It's not complex and subtle and annoying. Now I can show the world that Universal Human Moral Nature is ethnicity-independent and totally destroy Bill Gates.

You see, Daniel Stroock was unkind to me in a way, but he is normal for this age, and he's not so bad now, and is happy with some of my work. But Bill Gates is beautiful target. He is so outrageously racial that I see one of these bull's eye right on his forget with a haunting voice telling me "Shoot this man and kill him. Zulf, Zulf, shoot here, in the fore head of Bill Gates and kill him. Zulf, Zulf, the time has come to whack Bill Gates."

And suddenly this racial prejudice issue is no longer a huge and complicated difficult issue but fun.
