

PERSONALITY AND LIFE SATISFACTION BASIC RESULTS

ZULFIKAR MOINUDDIN AHMED

1. THE CORRELATIONS

	var	ls
1	O	0.147
2	C	0.273
3	E	0.250
4	A	0.207
5	N	-0.385

The table is from [1]. They don't provide percentage variance of life satisfaction explained but it ought to be similar to [2] which is 25% of variance.

Thus we have 75% still requiring accounting, and we have a firm base of 25% of Life Satisfaction variability directly explained our personality traits. This is the firm basis of Life Satisfaction targeting.

2. SIMPLE VARIABLES: MARITAL BLISS

	m	u
unsat	1593	787
sat	5795	2469

For married folks, satisfied percentage is

$$LS_{married} = 78.44\%$$

and

$$LS_{unmarried} = 75.83\%$$

The difference is

$$\Delta LS = 2.61\%$$

This is an important number and statistical significance is clear.

3. SIMPLE VARIABLES: KIDS OR NOT

$$LS_{nochild} = 75.98\%$$

and

$$LS_{children} = 78.54\%$$

Difference

$$\Delta LS_{children} = 2.56\%$$

Date: June 25, 2021.

4. COMMENTS ABOUT MARRIAGE AND CHILDREN SATISFACTION

These Life Satisfaction increases are extremely ancient and primal transformations that are producing statistically strong life satisfaction increases, for marriage and children are evolutionary necessities of the Human Race. In these extremely clear and strong cases where we are very certain that life satisfaction increase is *pure* in the sense that our biochemistry and evolutionary adaptations are honed to produce the life satisfaction increases we are getting changes of 2.61% and 2.53%. So that is the sort of calibrated scale for certain life satisfaction increases that might be possible by other variables.

Our reader should be very clear that both marriage and having children *increase life satisfaction* for both men and women and they do so by a precise quantitative amount that should be considered the measuring standard for other possible life satisfaction increases. We want to ensure that our readers are absolutely clear that these are highly expected results and not random measurements because we are mammalian and have evolved to increase our life satisfaction by mating and reproduction.

5. SOURCES OF MY GOOD LIFE SATISFACTION

My Life Satisfaction is around 7-8 right now out of 10. I have achieved immortal genius with Four-Sphere Theory that is such an astounding success far surpassing Einstein, Schroedinger, and Lemaitre, that is the actual physical law governing the universe that I simply cannot see my Life Satisfaction as lower because I have achieved what Elizabeth Waltien was hoping I could when I was a young lad in John Adams High School. Never mind that I am living on disability with my aunt in Allen Texas at 48. I have succeeded in such a deep way. And yet it is not 9 or 10 because I am constantly mistreated by my aunt and also because I now have to ensure that *Bill Gates* is killed because I am sure that he is malevolent and I have to care about the future of my Beloved People the Human Race. I can't allow him to live. It would be preposterous. I know he means to harm so many people. I discovered that he is Evil and I do have a responsibility for the well-being of my Beloved People the Human Race.

If I had to guess the factors affecting my life satisfaction, it is my optimism about the future, and also the absolutely lovely sweetheart Darina who I met over the internet. I would like some success – I did earn \$120 million from D. E. Shaw & Co. that Bill Gates is blockading. This man is such a mean malevolent cunt I cannot believe that he even exists. He's much worse than any bad person who ever existed in history. I am seeing it as a Heroic Ordeal to Slay the fuck. He does need to be killed and killed and killed and killed and destroyed and obliterated and killed even more.

6. THE MOST IMPORTANT KNOWLEDGE IN LIFE

From cradle to grave, the most important variable that we are all interested in maximizing is Life Satisfaction. As is well known, this is not happiness in terms of positive affect but satisfaction with lived life. Thus knowledge of the precise variables that tell us what to do to achieve life satisfaction is substantial and important knowledge. When every one of 7.8 billion has crisp and clear understanding of the

variables that matter and what to do to increase life satisfaction directly and with confidence, the entire Human Race will enter a truly new phase in our history.

Never in our history has this ever been crisp and clear and concrete. We have had only confusion on these issues in the past. The most important achievement of this entire Age will be to have clarity regarding this. Until we have certainty regarding this, we are lost in confusion and chaos.

7. THE SUBSTANTIAL ACHIEVEMENT OF PERSONALITY PSYCHOLOGY

The sum total of substantial contribution of Personality Psychology is right in the table at the top, that each of the five factors of Personality have a positive correlation with Life Satisfaction. This is the real reason they *matter*. What we need to know, then is the *percentage of variation of Life Satisfaction explained by the Five Factors*. Once we know this, we will have sharper sense of the intrinsic (mostly genetic) factors, how we ought to change and develop in our Personality, and other things we ought to understand from the external world in order to secure our Life Satisfaction.

When we have these, and they are available and clear and simple to every person on the planet, a great phase transition will occur on Earth, that will transition us from a Primitive Age of Man to a less primitive age, a more enlightened age. And that is one of my fundamental goals, to reduce confusion and to bring forth a more enlightened age.
