

HOW GREATNESS WORKS AND WHY I GREATER THAN ISAAC NEWTON

ZULFIKAR MOINUDDIN AHMED

Greatness is not a matter of social consensus in Science. Yes, I am familiar with Thomas Kuhn's work on Scientific Sociology. And yet Greatness in Science is not a matter of Social Consensus. It is about fundamental work in elucidating the secrets of Nature. My Four-Sphere Theory [1] is simply Truth. I have overthrown Gravity itself, one of the best theories of Isaac Newton; I have overthrown Einstein's Relativity and Schroedinger's Quantum Mechanics Theory. I have overthrown Big Bang and Expansionary Cosmology. My notes give details. There will be no possibility of dislodging Four-Sphere Theory at all in the future. The universe works, at the levels I describe, according to my S4 Electromagnetic Law. So my Greatness is intrinsic and it does not matter who recognises it besides myself. I just produced a breakthrough in Social Science, fitting Generalised Linear models with logit link to all the variables from World Values Survey related to Child-Rearing Moral Values. This is a great advance in Man's Understanding of our own Moral Values, and this parsimonious model will lead to bounds on Ethnic Effects on there Moral Values which I expect, based on actual results to be lower than 13.9% of the variation. This is as great an advance as Evolution Theory of Charles Darwin.

My Scientific Genius is broad and spans Physics to Psychology to Social Science. This is a matter of innate sense and development of a sense of devotion and reverence for Nature.

Some will think that this is just an over-reaction to Racially Hateful denigration by Bill Gates. This is not so. I am simply Greater than Isaac Newton as Scientific

Date: May 23, 2021.

Genius. It's not a frivolous emotional reaction to inane and petty things. It's just true.

1. RECOMMENDATION TO A BIOGRAPHY OF NEWTON

I will recommend a biography of Newton that fascinated me. I remember it well. *Never At Rest* by Richard S. Westfall. My father, when we were little, would recite Newton's laws to us when traveling. So I have no animosity toward's Newton's Greatness. But it's true that I am greater, so it is so.
