Alright United States Government,

I was hobo in New York Downtown for six months in 2008 and that is where I heard "cunt" in action. I never used the word before I saw it in street use. Now I know that some of you think this is a "hate word". That's not very good. You see "cunt" apparently means female genitalia. Well it never was used that way in actual speech. In vernacular speech it is a term to represent moral disapproval. Like "asshole". "Asshole" is the orifice for human fecal output. But it never *means* that in vernacular speech.

Now pay attention because I am the master of sharp use of words. Cunt means a specific type of morally abhorrent person. It is someone who is brazenly *entitled* when they take advantage of others. So it is the man who comes to visit you, fucks your wife, sleeps in your bed, raids your refrigerator eating all your favourite chocolate you bought for your wife for Valentine, pushes your granny over the bridge and kills her, pisses on your carpet, and then has the audacity to pretend that you hurt his feelings. That's a *cunt*.

It is indeed a hate-word if someone is not a cunt but you call them one. But Bill Gates is a cunt. In fact Bill Gates is one of the purest forms of cunts I have ever encountered. In the history of all people who have ever been cunts, Bill Gates will stand out as the glorious heights of cunthood. So I am not only not *apologetic* but quite profoundly proud to have discovered this about Bill Gates. It's *glorious* as a discovery. I don't go around calling people cunts when they aren't cunts. Mm,kay?
