

## ZULF'S ACCOUNT OF WHAT HAPPENED WITH BILL GATES, D. E. SHAW & CO. AND MYSELF

ZULFIKAR MOINUDDIN AHMED

For a few years I was working on some Finance problems. I worked on a long memory closed form stochastic volatility model with jumps in both price returns and volatility. It was a beautiful effort that gave me a more accurate stochastic volatility model (in fit to empirical volatility surfaces) than Heston's and Bates' models which are both quite excellent. I was quite pleased with my long memory closed form stochastic volatility models. Then I started thinking about assumptions about arbitrage free price movements, and I decided that this is not actually true, and began expanding from *high frequency* to medium frequency. I played around with random things until I hit upon a truly marvelous and great genius in Finance, systematic arbitrage in every market, and my approach gave truly spectacular results on historical data. Note that this is several years of serious effort. I could not raise funds to trade it myself. I can handle several hundred million without trouble. Larger amounts need some extra infrastructure to avoid moving the markets etc. Anyway, D. E. Shaw obtained the results and ideas I was disseminating to raise capital. Henry Jarecki was not into it. I was fine with D. E. Shaw & Co. trading the whole thing. They said they 'found it in the wild'. Well it's my work over some years, it was not done by a bear or tiger or wildebeest. It was done in Allen Texas by myself with hard work. But I decided D. E. Shaw is good and so long as I get a good compensation from investment into it, I won't worry too much. I got Bill Gates interested in it and arranged a trade where he borrows from Goldman and puts some money into my strategy with D. E. Shaw. Now David E. Shaw is going to not dispute that it's my work.

Bill Gates decided that this work is 'trivia' which made me royally pissed off that an illiterate college dropout ignorant son of a bitch who knows absolutely nothing whatsoever about Finance dares to even comment on my genius work in Finance, let alone judge it in a derogatory way. The little shit does not even know how to code properly, has no proof that he can do any software engineering, and he dares to denigrate my great genius work in Finance which should get several Nobel Prizes in Economics.

Well, D. E. Shaw decided that they 'did not want the liability' and never emailed me any acknowledgement for my work. I got them India investment of \$4 bn and Bill Gates decided to put in \$2 bn into *my strategy*. Then he decided that I was not 'worth the fee'. In reality he is an extremely racist guy who does not want any non-white guy to get any earning at all. He of course has no actual say in this because I am a Finance professional and investors do not have any right to get into the business of the fund manager. D. E. Shaw ought to have made this clear but they are apparently just worried about Bill Gates' power since he is a murderer and he retaliates and D. E. Shaw did not want to deal with that without protection.

---

*Date:* June 30, 2021.

The bottom line is that D. E. Shaw does not dispute that they are trading my strategy, and are willing to concede \$120 mn now is my money, but Bill Gates forbade them from paying me. This is part of his racial program to ensure that American non-whites cannot get paid any serious income even if it is fair compensation.

US Government ought to have jailed him and killed him for these infractions of US Commerce Law, but Bill Gates doubled down and cut into my eyes and began violating my Natural Rights instead of leaving the issue to a matter of commercial issue. He ought to be relentlessly bombed and obliterated physically. He should not be involved in Finance at all since he is totally incompetent at it. He had no business getting involved in my legitimate earning. I will get very angry at the US Government and abolish the entire United States of America eventually if US Government does not fix these problems.
