

## UNITED STATES OF AMERICA HAS FAILED: NEW PLANS

ZULFIKAR MOINUDDIN AHMED

United Nations Security Council, I have been examining whether the United States of America is appropriate for securing Natural Rights of American People. My judgment is against it. I want the United Nations to plan a new organisation to replace the entire United States of America. I have given the US Government an entire year and right now my breathing is hoarse and I have unbearable pressures every time I lie down due to Bill Gates doing horrible evil illegitimate murderous considers. I have a lot of paper trail going back a year where I have repeatedly asked the US Government to relentlessly bomb and obliterate Bill Gates physically. They did nothing. They go around using drones on all sorts of unsuspecting people around the world going to supermarket to buy milk but for an entire year I ask them to kill a proven murderer and they do not respond. The world does not need this organisation at all. I want United Nations to draft a new organisation to replace the current dysfunctional United States Government and design a new government which is based on the US Declaration of Independence Preamble and the same sort of tripartite Executive, Judicial, and Legislative parts in the Federal Government, but I want actual focus on Natural Rights Security from the Executive Branch. I am not impressed with this broken US Government at all. It does not work as advertised and I don't want it.

Can you please do this quickly. A lot of American People need a government that works as advertised. Also when you hire people, please test that they understand Natural Rights of people. It's not an easy concept and I am not sure that US Executive or any other part really understand it uniformly.

It's only 250 years old so do not get intimidated by the amount of work. I am giving the United States of America a fail on working as advertised in US Declaration Preamble. Don't fix it. Throw it away and just replace the whole thing. It's junk if it does not work. Not worth fixing.

And I assure you that it does not function as advertised. I am a patient man. Murderers kill people even when every one of US Government Branches know their plans. That's not pleasing to me. My people are eight million. I don't want junk for them. The American people deserve more respect than this.
