

ZULF SHREDS UNITED STATES NATIONAL DEFENSE STRATEGY 2021

ZULFIKAR MOINUDDIN AHMED

You want me to show you? Take a look at your National Defense Summary. I'll dissect for you all the problems in it. [?]

"Today, we are emerging from a period of strategic atrophy, aware that our competitive military advantage has been eroding. We are facing increased global disorder, characterized by decline in the long-standing rules-based international order—creating a security environment more complex and volatile than any we have experienced in recent memory. Inter-state strategic competition, not terrorism, is now the primary concern in U.S. national security."

So first of all our military did not even know that Human Rights Declaration of 1948 was international law and you killed $N(\mu = 1120, \sigma = 223)$ people with drones by arbitrary assignments. One has to ask who is causing the disorder in the world. You did not train our military about international law of human rights and you want everyone to believe that the disorder of the world was not caused by you? Unbelievable. There were no hijackers on the planes of September 11 2001, and you destroyed two countries with all manner of planned wars for regime changes, and the disorder of the world was whose fault? Of Iraq and Afghanistan or yours?

You want now war with China and so you couch language of 'inter-state competition'. Let me show you. Let me show you how easy it is to shut you down. You keep dreaming about more destructive lawless wars in Asia, while I snap my fingers and see Eurasian Defensive Alliance. Suddenly what happens to your 'inter-state competition'? Your transparent ploy for war in China suddenly faces all of Eurasia prepared to defend jointly against your lawless aggression.

You're puerile National Defense Strategy becomes scrap paper doodling of a daydreamer who flunks third grade. Ok? You want to compete with an Archangel of Heaven you got to do better than that.

I can shred your puerile National Defense Strategy in minutes. Your narcissistic echo chamber is not how the world is, United States Government.

1. DON'T MISTAKE ME FOR LEFT CRITICS OF AMERICAN FOREIGN POLICY

Look I know Noam Chomsky's work on criticism of American Foreign Policy. I am not Noam Chomsky, so don't get confused. If I don't see my natural rights and American Dream restored in tip-top condition with \$620 million, I will change the world order and nix American Hegemony for a millenium so that you can't even do a thing about it. Do I make myself clear?

2. NATURAL RIGHTS WORLD ORDER COULD COME FROM EURASIA

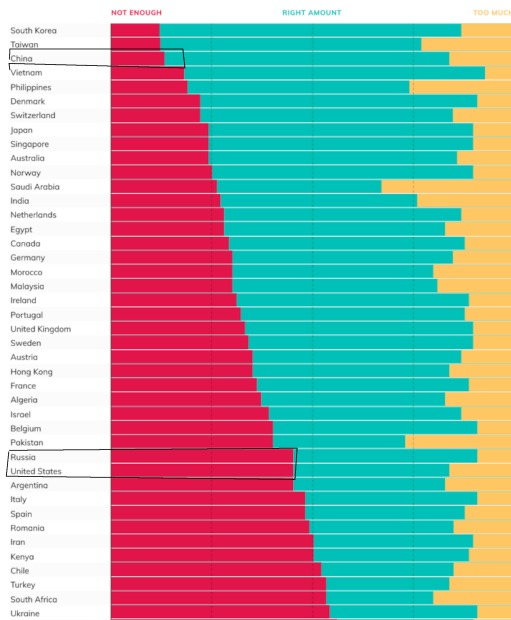

You see, United States Government, you want wars in Asia. You think containment will work with a bit of cold and then hot war with China or Russia. That's your play. Well I can unite Asia, form Eurasian Defense, expel you from Asia altogether, get Natural Rights World Order initiated from Eurasia and you'll be a secondary global power with nothing to do but jerk off for five centuries because your "Gimme something to shoot and let God sort them out" approach will not be tolerated any more.

3. INDIA AND CHINA HAVE HIGHER DEMOCRACY SATISFACTION THAN UNITED STATES

About 50,000 people were polled around the world for Democracy Perception Index in 2021. Here I am, being destroyed by a racial murderer having my legitimate earning of \$620 million obstructed. And how strange is it that China and India have much lower democracy dissatisfaction than ourselves in America? China's dissatisfaction is 12.5%, India's 26-27% and United States about 45%. You can see it here [?].

40% of people say there is "not enough democracy" in their country

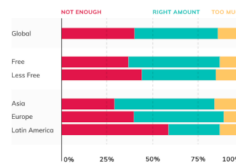

% say there is "Not Enough", the "Right Amount" or "Too Much" democracy in their country

Not Enough Democracy

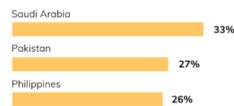

The feeling that there is "not enough democracy" is as high as 37% even in countries considered "free" democracies, led by Poland, Brazil, and Greece.

Overall, this sentiment is highest in Latin America (59%), then Europe (40%), and lowest in Asia (29%).

Too Much Democracy

The countries with the largest share of people who think there is "too much democracy" are Saudi Arabia, Pakistan, the Philippines, India, and Taiwan.

What are we doing this state-competition for? Our own natural rights and democratic satisfaction is dismal compared to China's right now.

American people thinks that our government serves a minority.

How sad is that? China's people don't think that their government serves a minority and American People think that ours does. And you, the United States Government *literally collude to destroy me with Bill Gates who is a racial murderer*. Do you have no decency? Do you not have any shame? Fine I took that from *Law and Order* the popular television series. Look my breathing is heavy and my deep interior is devastated and India will eventually hold you accountable for the harm to me under your care.

4. LET'S TAKE A LOOK AT THREAT TO PEACE

We return to 2014 when the world was asked who is the greatest threat to world peace by WIN/Gallup. We, United States won 24% of the votes followed by Pakistan 8%, China 6% and North Korea, Israel and Iran 5% [?]. The entire world is quite anxious about your planned wars in Asia with all manner of rubbish rhetoric. I will not tolerate it at all.
