

WHY TOTAL DISASTERS LIKE BILL GATES GAIN GREAT PROMINENCE IN AMERICA

ZULFIKAR MOINUDDIN AHMED

Bill Gates is one of the worst unsavory human beings on Earth. He has had secret plans to enslave all Asians and rule the entire world as a Tyrant removing Natural Rights. These I can vouch for myself.

I can assure you with 100% certainty that neither in Europe or in Asia a man of this type would have even gotten a job at all let alone become a tycoon with \$131 billion. His ideas and manners are so horribly outside the bounds of Civilisation that both in Europe and Asia he would have been killed by the crowd or the state before he managed to get anywhere.

So why do disasters like this occur in America? My explanation is simple. United States of America is based on some radically innovative ideas, based on Natural Rights Security from 1770s. It is not a country with thousands of years of history. It is a nation peopled by immigrants. So it will take thousands of years before America can truly gain an organic set of social norms and a unity because those things take a long time. So here you can have a successful man with the most outrageous ideas and activity because social constraints to Civilised behaviour are missing. This produces a culture that is quite anarchic. And especially among people like Bill Gates whose education is horribly bad, you have habituation based on wealth alone. America has always had problems where wealth dominates cultivation. This was clear to T. S. Eliot in Boston, and there is also lack of unity that is implicit as in India. In India, despite the communal clashes, weight of history produced organic social norms and that is missing in America.

Bill Gates is an interesting peculiarity for these sorts of reasons.
