Jasmine Sackey visited today to ensure she was doing her job, to ensure that I visit the psychiatrist to get some meds. Their hypothesis is that I am experiencing some psychiatric disorder. I told her that Stanford University was being blockaded from offering me tenure and some simple features of my four-sphere theory. She is a health professional and is not able to appreciate technical issues of how my theory is superior to Schroedinger's theory for complex molecules where Schroedinger theory produces messy situations such as embedded eigenvalues in continuous spectrum while my theory produces *discrete spectra* for all molecules.

I have the great articles of Barry Simon on Fifty Years Of Perturbation theory to learn about the issues of Schroedinger theory. My four-sphere theory is obviously superior not just to Schroedinger theory but to other refinements embedded now in Quantum Electrodynamics.

I am quite concerned that Stanford University has to be circumspect in offering me tenured full professorship despite my breakthroughs in theoretical physics with voluminous empirical evidence. In the long run United States Of America will not be seen kindly by people in Asia and Europe if a hick charlatan from podunk with despicable disgusting vile political ideology of enslavement and conquest of non-white people, who is trigger-happy with use of (a) US War Power, (b) US Industrial Power, and (c) White Racial Power as well as totally demented and deranged idea of his own 'white identity' which he had zealously followed all his life. This ideology is that white people exist to harm and destroy, enslave and cause misery for non-white people. I have heard the man say 'white happiness is inversely proportional to non-white happiness' sometime. I can search for the exact date, but sometime in the past year. I actually spent some time on data on white and black happiness changes year-on-year in the United Kingdom and found a 26% correlation. This contradicts his ideological convictions, but the man is obsessive and does not relent based on such trivialities as measured data because he is zealous not based on any facts but because his natural primitive savage state is close to that of seventh century BC Deuteronomy in tribal domination and not even the Medieval Times.

He had been practicing black magic to harm body and minds of other people from early years and who had lied about his own intellectual acumen, including SAT score and IQ level to bamboozle the world and convince them that he is a great coding genius. He does not reveal any code, which suggests that he does not have any coding genius at all and had been lying to the world about this. I don't believe for even a second that he has any gifts in coding. I was the Senior Software Architect for Robert Reich's Ecosystems Inc. in 1997, and worked on document

management systems on object databases for Blue Cross and Blue Shield solo, and did the entire backend for them. I did a Codility Test in 2018 and obtained an A out of A+ for an interview with Swirlds. I assure you that this man, *Bill Gates* is a total charlatan as a software engineer and has menial skills in it. His talents lie in *criminal use of illegitimate powers* to harm people's careers, body and health, and not much else. He has no great talent in software engineering. He is a talentless scrub in other intellectual matters.

United States Government will face a crisis of legitimacy if I end up losing my life from the wounds inflicted in my Deep Interior by aggressive and illegitimate invasion by Bill Gates.
