

ZULF EXAMINES DEATH PENALTY IN AMERICA

I am most annoyed. American Whites have to be more vigilant about these problems. Why are 77% of the death penalties for killing white people. I want death penalty for Bill Gates for a murder plot against myself, an Asian-American immediately.

This graphic is from Amnesty International [1]

I want to make this very clear. I want Bill Gates put to death for all death penalty worthy crimes he has committed against me. What do you take me for. I don't give a damn if he is white or purple. Death to Bill Gates!

1. DEATH PENALTY WORTHY CRIMES OF BILL GATES

Bill Gates was sentenced to death penalty for War Crimes and Crimes Against Humanity for enormous damage to my Life, Liberty and Pursuit of Happiness. I demand that Pentagon respect this judgment and kill him physically immediately with lethal military force.

2. AMERICAN WHITE VALUES ABOUT DEATH PENALTY OFFENSES

First of all a good overview of scholarship of race and ethnicity in the American Criminal Justice System can be found in this work [2]. I am not directly involved in this at all but I warn American Whites not to provoke Zulf because if I get involved I'll clean up this mess in such brutal efficiency you won't even know what is up and what is down afterward. Do not provoke Zulf at all. Zulf is quite merciless.

3. RACE AND CRIME STATISTICS

In America, race and crime statistics focus on three groups with significant crimes. Whites, blacks, hispanics. A typical summary can be found in [3]. I have done some analysis of my own, and I have a clean record. What most typical analyses fail to mention is that Asian-Americans like me are not even on the crime statistics radar.

Let us make our point that Asians are the least criminal ethnicity in America for murders. The following table I constructed just now.

The data for the table can be found in [4] and [5].

I won't comment about other ethnicities, because my conflict is with Bill Gates. I want you to focus on the rough measure of ethnic propensity to commit murder

Date: November 15, 2021.

	Ethnicity	Population	Murders	Ratio
1	White	60.30	45.84	0.76
2	Black	13.40	51.17	3.82
3	Native Americans	1.30	1.54	1.18
4	Asians	6.00	1.36	0.23

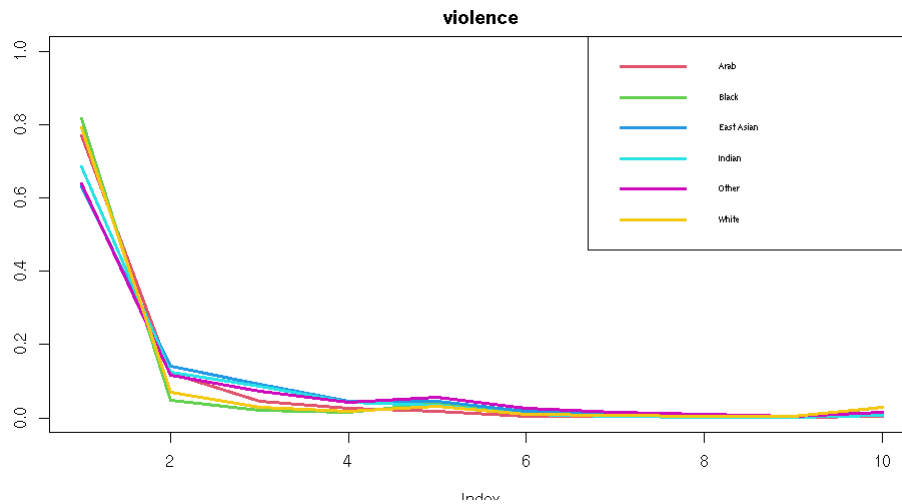

between *whites* and *Asians* only. This is not an objective analysis. I am trying to get people to put a white man, *Bill Gates* to death. I am the victim here. So I want the world to understand that these White Americans are quite civilised for the most part but we cannot ignore that their propensity to murder people has ration 0.76, which is more than three times higher than *Asian-Americans* such as myself.

4. PUTTING THESE IN BROADER CONTEXT OF MY THOUGHT

I have been working on human nature, which I consider mysterious and deep and not yet clearly understood. I have been busy with issues brought up by Steven Pinker's work in *Better Angels of Our Nature* and have been challenging his account about just how violent our distant ancestors really were. I won't go into the delicate issues. My strong conviction is that *murder and rapes are not human nature*. In other words, I have a strong conviction that murders and rapes were never part of our evolutionary genetic heritage at all, and they represent a sort of *hazard rate* or failure within us. In truth, the murder and rape rates stay within remarkably low bounds uniformly across the globe and this is a remarkable fact that requires exploration. The arguments I have above are about *relative murder rates* in America. That is to make a political case that Bill Gates, who is white, ought to be put to death for being a murderer, and that his white ethnicity is substantially higher in murderous propensity than my Asian-American identification. But in the broader context of human nature, *neither white nor Asian or any other ethnicity* had murder in their human nature. All of them are failures that are due to post-birth conditions.

5. REMINDER OF ETHNICITY INDEPENDENCE OF MORAL VALUES REGARDING VIOLENCE

I have over the past year discovered the basis of universal human moral nature. Above we have some concrete data about murders in 2019 America. I want to remind my dear readers one of the most important of my discoveries next, which is the ethnicity independence roughly of human moral *values* in the global population regarding violence against others.

I won't go into detailed analysis. This is one of my great discoveries of which all previous ages of Man were ignorant, that human moral nature has an invariant quality across the globe quite independent of ethnicity, place, and other demographic variables, and this overthrows the moral philosophical basis from Socrates to Immanuel Kant and Friedrich Nietzsche, who sought to fathom the basis of human morality in reason in the case of Socrates and Athenians to Enlightenment philosophers like Immanuel Kant to the peculiar creative genius of *On the Genealogy of Morals* by Friedrich Nietzsche. My discovery refutes their efforts clearly.

Now there are minor fluctuations due to ethnicity in these universal human nature distributions, but they are not dominating them at all. It is foolish, therefore to consider some 'racial character' for higher or lower morality.
