

ON JUST HOW PATHETICALLY PRIMITIVE AND WORTHLESS BILL GATES IS FOR PROMOTING WHITE SUPREMACY

ZULFIKAR MOINUDDIN AHMED

1. HOW PATHETIC AND WORTHLESS BILL GATES IS FOR PROMOTING WHITE SUPREMACY

I have a successful approach to abiogenesis and it's right. I just received a book on *Human Genetics*. I have so much to contribute to the world still. I just needed to clear up abiogenesis because Genesis of Life was in shambles and the Ospirin-Haldane ideas were not good enough. I am looking at understanding human nature now. With 99.9% of all human genomes being exactly identical, it is very clear that our future evolutionary potential is quite tightly restrained. I recently gave the estimate of 5.5-27 trillion unique human genomes. We are so far past tribalism based on ethnocentrism that this Bill Gates ought to be continuously bombed to obliteration for promoting plebian ignorant rubbish in 2021 like White Supremacy. He's like an early amphibian whose limbs can't maintain their weight. He's like a man whose mind is ready to be extinct already. He is so worthless that I don't even have a scale to tell you just how worthless he is. He simply needs to die, ok? We cannot afford to have cunts like him even living in America, let alone be respected and granted all sorts of money and power. He should be used in a Museum for people who want to test whether they can choke and kill a man with their bare hands.

2. WHITE PEOPLE ARE ABOUT AS INTERESTED IN TEACHING TOLERANCE AS OTHER ETHNICITIES

Bill Gates is obviously an anomaly among white people. For your convenience I will show you the statistics of percentage of people who think teaching tolerance and respect for other people broken by ethnicity.

	1	2
Black	0.60	0.40
East Asian	0.54	0.46
Indian	0.75	0.25
Other	0.65	0.35
White	0.62	0.38

This is just tabular data from Q12 of World Values Survey on "important for children: tolerance and respect for others". White people do not think it more important than Indians, but more than East Asians and Blacks. I am of course enlightened and wise and do not believe that Bill Gates represents the American

Date: June 18, 2021.

White Community. What I do believe is that American White Community is deluded and thinks that he's a decent chap. He is much worse than any Nazi German ever born on issues of racial supremacy and he's also just a little malevolent cunt. He should be killed immediately.

3. HUMAN RACE IS A SINGLE RACE

Around 99.9% of our genome is totally fixed, and the possibilities for the rest is quite limited. We literally share entire evolution of all animals back to 3.5 billion years up to 75kya of co-evolution. There is nothing that is less ignorant and backward, primitive and barbaric, than Bill Gates and his ethnic tribalism. People who are ethnic tribalists will quite quickly be totally shunned from all parts of civilised life on Earth altogether. Bill Gate is pushing for Harvard to give tenure only to white people. These efforts are not just foolish for Harvard, but quite suicidal. Harvard is at a point in its history that if they even remotely consider these sorts of things they will lost all credibility of how long is it, almost four centuries. If Bill Gates were actually right, then why is he trying to harm me day and night with black magic and every other horrific thing? It's obvious that Bill Gates knows that I am far superior to him, and he just is trying to convince people of all sorts of lies because he can't compete with Zulf.

4. ZULF VINDICATED ARISTOTLE AND SHOWED LIFE SATISFACTION INCREASES WITH VIRTUES

For centuries, we had been confused about the importance of virtues. Psychology of the entire twentieth century was a dark moment in enlightenment, with behaviourism, decimation of Character and Virtues as 'old fashioned' and a technical mechanical engagement with psyche first with B. F. Skinner, then Cognitive Revolution of the 1950s, and slow revival of sense, total refusal to consider the deep ideas of Carl Jung seriously. Well I not only showed regularity of moral values across the world but also vindicated Aristotle's Virtue theory with actual high quality measured data from World Values Survey.

There is not better explanation for this that Virtues and morals are part of our deep evolutionary adaptations that are not fully understood yet. The clarity for seeing this is my work, my individual effort in the face of extreme adversity when I, a Princeton graduate, have laboured for the love of my beloved people, the Human Race, while Harvard and others are still unable to respond to my request for a couple of doctorates and a full professorships and malevolent white supremacists like Bill Gates cut up my eyes and denigrate me. In this dissolution of all Civilisation, in this horrific barbaric age when the Bill Gates' of the world pretend to be benefactors of the world while plotting malevolent evil, I stand as a beacon of Light and Hope for the future of Civilisation.
