

## **ZULF DESCRIBES THE DYSTOPIAN FUTURE IF WHITE AMERICANS DO NOT KILL BILL GATES**

ZULFIKAR MOINUDDIN AHMED

If 4.5 billion Asians gain consensus that it is legitimate to destroy white Deep Interiors and invade them then the calamity will be quite dystopian. Most white people will die because the physical body cannot tolerate the stress. There will be many deaths from disease from the damage to meta needed for health. Joy and happiness will wither. The survivors will face horrible disabilities and physical ailments. And everyone outside of America will feel sad and say this was karma for what White Americans did to the Native Americans. American Economy will collapse. Then retaliation will be hard because American Military will be too sick to fight.

All this can easily happen by a snap of fingers from me. I would advise White Americans to avoid a horrible fate and just kill Bill Gates and I will not pull the trigger.

You see, some of these horrible things I have endured already, so I won't feel guilty.
