ZULFIKAR MOINUDDIN AHMED

Bill Gates' lifelong extortion racket and corruption of US Commerce is simple. He goes to extremely high power and randomly forbids anything he does not like without any regard for conformity to US Laws at all. Since US Government is slow, incompetent, ponderous and does not actually care about much more than taking our money and not doing much, they did not even know about this for four decades and considered Bill Gates to be a reputable businessman.

Finally, recently, thanks to some in the US Government such as General Lloyd Austin, US Defense is investigating this. This is such a criminal thing that Bill Gates has been doing, totally ruining many companies by leveraging high power forbids that it ought to be considered a criminal negligence of US Government to allow this horrible corruption of our Corporate Economy by Bill Gates.
