

ALL ASIANS SHOULD IMMEDIATELY RATIONALISE ASIAN DEFENSE

ZULFIKAR MOINUDDIN AHMED

In history of humanity over the past millenia, nation states have risen to prominence, and by and large they have been good, and I will refrain from going back to my idea of a Great Republic of Humanity. Instead I will propose something less radical.

The premise I have is that some parts of American Government are the major source of problems for war in the world and specifically in non-white Asia. There are some other trouble spots but today, the most significant source of wars is American Government, and the location is Asia. Therefore it is reasonable to seek some innovations in governments of Asia.

I would like to see a pooling of defense of all of Asia that is joint defense, and include Russia in Asia please for this. I want joint coordinated defense of all of Asia and rationalisation of all Asian defense forces from all Asian countries immediately. The great threat of war arises from United States of America, specifically the part of the government that is post NSC-68 and unaccountable to democratic control within America. This is a significant source of threat to natural rights and peace and security of Asia.

In order to handle this threat, Asia must pool together defensive resources across the continent and not be sitting ducks for divide and conquer strategies of these ambitious people who are interested in control of Asia by arbitrary regime changes, terrorising the Asian population by extrajudicial drone murders, and other means. Asians are precious to us and we do not want any Asians falling prey to these murderous genocidal people and their plots and plans for Asian resources and other nefarious conquest plans.

1. ASIAN DEFENSE DISCIPLINE SHOULD BE FACING ONLY NSC-68 PARTS OF AMERICAN GOVERNMENT AS MAJOR THREAT

I want all Asian Defensive attention focused on NSC-68 parts of United States Government. This is the source of threats to entire Asian Continent. It is not as valuable to get obsessed with border conflicts and such. Those are minor and all intra-Asian disputes ought to be immediately reported in the United Nations and resolved peacefully.

I also want Defense Technologies to be pooled in Asia, and defense discipline uniformised for all of Asia to be based on intelligence primarily of NSC-68 parts of United States Government.

Asia is Old World. Asian tribal and border conflicts are old and they do not need military attention so much. I want all Asian countries to sign a pledge to refrain from use of military force against each other at all.

Date: December 13, 2021.
