

ZULF'S PREDICTIONS OF WHAT WILL HAPPEN TO BILL GATES WHEN HE REVEALS HIS ETHNIC CLEANSING OF NON-WHITES FROM AMERICA

ZULFIKAR MOINUDDIN AHMED

Princeton, Bill Gates thinks that since he has been able to harm me by black magic and racial power and US War and Industrial Power to impose his will to destroy lives of non-whites and ethnic cleanse non-whites from America, that this means he will succeed in his agenda. I am indeed hurt badly, and might even die from my wounds.

But reality is this. He does not know anything about democratic politics, has not even read Alexis De Toqueville's magisterial volumes on *Democracy in America*, does not even have AP High School level understanding of Democratic Politics. If he puts down his goals on a platform and makes it public as all political platforms have to do, I will predict the following.

First, American liberals will invent satellite guides rotten tomato missiles that are non-lethal but smashes into his head overcoming large numbers of semi-military body guards. If he shows up in Bay Area of San Francisco he will have his security vulnerabilities be breached and a crowd of American liberals – mostly white – grab him and beat the living daylights out of him in an ecstasy of physical violence never imagined even in *Fight Club* and dispose of his body in the Pacific Ocean with great joyful celebrations that will give Rabelais pause.

Bill Gates does not even comprehend the democratic rancor that led to the immigration laws that are implemented by US Citizenship and Immigration Services for over a century, that gives me my immigration status. He literally is more deluded and ignorant than a lackey of a pizza boy and thinks that he can just make my American status change by a snap of a finger. The Genie in the Lamp could not do that, let alone a man without any experience of democratic political process.

1. UNBELIEVABLE IGNORANCE IN POLITICS

I have discovered the invariant universal human moral nature in terms of distributions from World Values Survey that are roughly ethnicity independent globally. People around the world overwhelmingly good in moral values, some 90-95% have strong convictions about good morals. Only a total idiot would be bad on moral values and consider political platforms in any part of the world. Bill Gates has views that are positively evil. He believes that white people exist to cause misery and suffering to non-whites. With those sorts of values, he would have a hard time getting anywhere in politics in Evilvania, let alone America. He believes that power makes its own morals. And that would be really popular in a country of 330 million where most people do not have all sorts of power. People would, in his judgment

say, "Ah, this evil man who says power makes its own morals is obviously someone I want to back." Those things are not possible in this world.
