

**ZULF'S LETTER TO PRINCETON UNIVERSITY REGARDING
AMERICAN GOVERNMENT 1.4 MILLION**

ZULFIKAR MOINUDDIN AHMED

My Dear Alma Mater Princeton University,

I have discovered that the 1.4 million white people in American Government are not willing and able to secure natural rights of the 330 million Americans in this nation. I am Asian-American; you know me well because in Fine Hall basement library you can find my beautiful thesis of 1995 in several complex variables for which I received the prize for the most original thesis in Mathematics of that year. In any case, many years have passed since my days at Princeton and my hairs are now grey.

What I want to do is seek your assistance to find 1.4 million Americans who are good and competent at dedication to securing the natural rights of 330 million Americans. Princeton has 94,000 alumni, and I believe that we can find appropriate group of 1.4 million who are interested in securing natural right of 330 million Americans. My illustrious predecessor James Madison, as you are quite well aware was working on some of the problems of American government. I will be able to provide some leadership on these issues.

The potential problem is that around 1.4 million white people in American Government are confused about what they are doing exactly in the government. They are not very clear that by US Declaration exact wording, they are employed to *secure natural rights of Americans*. Instead they have all manner of rubbish that they think is very important in their jobs. Well, obviously we cannot have any civilised country at all if this persists.

There is an *Abolition* clause in the US Declaration of Independence. We can replace the 1.4 million white people currently in government with 1.4 million Americans who are much more clear about purpose of government exercising the Abolition clause.

Would you mind assisting Zulf on this important task?

Sincerely,

Zulfikar Moinuddin Ahmed

Princeton Class of 1995

Date: December 2, 2021.
