

# ETHNICITY EFFECTS ON MORAL VIEWS ABOUT BEATING WIFE

ZULFIKAR MOINUDDIN AHMED

## 1. INTRODUCTION

In America there are various horrible rumours about all sorts of people having propensity to beat their wives. We'll take a deeper look in actual measured data.

	eth	explained
1	Arab	3.16
2	Black	1.98
3	East Asian	0.46
4	Indian	0.11
5	Other	0.77
6	White	1.50

None of these effects are particularly strong. Let's look at the percentages that are in 1-5 (don't find beating wife justifiable).

There is no significant difference at all between percentages of Arabs, Whites, Blacks in those who find wife beating unjustified.

## 2. CONCLUSION

Don't have prejudices against other people considering them 'wife beaters'. This is highly offensive and wrong.
