

ZULF'S PRINCIPLES OF WORK

ZULFIKAR MOINUDDIN AHMED

Always have broad flexible vision but only iteration and small achievements work. Never plan a huge thing without practice. It will fail.

Never ever work to impress anyone. Always choose purpose that is important for Civilisation. Never work for people who do not respect you intrinsically. There are other better people to work for.

Never worry about impressing anyone at all. That's their headache. If they are meant to be impressed they will be. Otherwise they won't be. Focus on great purpose. Let them not be impressed.

Do what you love to do and don't do things where the small little achievements feel like grueling suffering. You're not meant for it. Pay attention to your affects. They are nature's perfect signalling. What gives you joy is right. What makes you miserable you should abandon faster than dropping a hot potato.
