

## ON THE TOTAL INCOMPETENCE AND FAILURE OF UNITED NATIONS SECURITY COUNCIL

ZULFIKAR MOINUDDIN AHMED

In meta, Bill Gates had done so much harm to me by November 4 2020, more than a year ago, that English Royal Menders concluded definitively that any Bengali man ought to have perished physically and died.

I went through meta where United Nations Security Council made the expert judgment that Bill Gates be put to death for *War Crimes* and *Crimes Against Humanity*.

Bill Gates had continued to harm me for an entire year while United Nations Security Council had found all possible excuses not to execute their own death penalty. They were literally *waiting* for United States Government to act. Now Bill Gates has so many cronies in the so-called *deep state*, i.e. the parts of United States Government created since 1950 with NSC-68, that he will be protected by people high up in power in United States Government who always prefer that the white racial genocidal murderer be given protection when the victim, regardless of legal status, regardless of residency or history or anything else, is not white.

But United Nations Security Council did not do anything at all to destroy the racial murderer Bill Gates. They could have asked Russia or China or another government that is not as corrupt with Bill Gates cronies to take lethal military action to destroy and obliterate Bill Gates.

But they are quite satisfied that they did a fantastic job not doing a goddam thing for a year.

Why should people trust that United Nations Security Council is doing anything but protect the murderers and threats to global peace and security after this empirical example of how incompetent they are, or lacking in will to enforce their own judgment.

They say "Oh we're just a legislative body." Fine, but why didn't you take into account deep corruption in the United States Government and ensure that your judgment was enforced? There are four other Permanent members. Why didn't you ask them to execute the judgment? What sort of nincompoop legislative body makes a death penalty judgment but then twiddles their thumb? What are you waiting for? Divine intervention? What the fuck?
