

ASIA DISCOVERS FASCINATING TIDBITS TODAY ABOUT THE 1590 SAT AND 160 IQ CLAIMS OF BILL GATES

ZULFIKAR MOINUDDIN AHMED

First Asia discovered that Bill Gates had used various evil power to make it painful for my body as punishment of a physical sort. White People in American Government were asked to intervene to stop him more than a year ago and for whatever reason they did not. These are extremely strong human rights violations and United States Government is responsible. Asia and Europe will vote to impose trade and economic sanctions that are not possible to veto at the UN Security Council. This is a very good idea, and Zulf appreciates the economic sanctions to force United States Government to reform. I am very pleased with Asia about this. Good.

Now College Board tells Asia that Bill Gates had some power and blocked them from sending reports of SAT and IQ etc. higher than his own to any colleges. His actual IQ is 120-ish which is a bit lower than around 134 of mine but it's a good score. His SAT score is 1290 not 1590. So it was some meta power block of his that led to College Board deciding to just raise his scores rather than be hampered. He is not as bright as me and many many many people I have known in my life. I am not obsessed by my IQ at all. I personally know many people with higher IQ than mine of many ethnicities. But Bill Gates is most definitely *not* among them.
