

## WHAT IS THE MEANING IN LIFE?

ZULFIKAR MOINUDDIN AHMED

I actually never spent huge amounts of time thinking about the meaning of life per se during my teenage and early adult life. I don't think this was a good or a bad thing. I did think about it later, especially after the failure of my marriage when my ex-wife left me and started sleeping with women, which made me think about Woody Allen's movie *Annie Hall* as particularly significant in my life. I have been told many times that I have had a trainwreck of a life in various ways.

Today, I think the important question is not the question of meaning of life as a fixed question but rather the set of concepts, subjective language that we use to remind ourselves that meaning is important for us. I am not impressed with the existentialists and absurdists and so on. They literally bore me and I don't have patience for them. Albert Camus was good but I can't stand the others. I have my subjective meaning from my own dreams and such. I believe that I have been an Archangel Soul in the universe for a long time before my birth. Then I know what I am doing on Earth, and then I don't have to worry about meaning in life at all. Now I will end up wiping out, killing, and obliterating Bill Gates, one of the tycoons of America mostly using US Defense and other nations out of sheer irritation at the insolence of the little cunt. He literally thought he was more important for the Human Race and America than me. That is too deluded to even contemplate. These little plebian illiterate deluded cunts do inspire pity in me sometimes.

### 1. ZULF SEEKS FORGIVENESS FROM THE FUTURE HUMAN RACE

My Beloved People, I have a heavy heart and a guilty Conscience now. I had discovered already almost a year ago that Bill Gates was an Evil Malevolent Demon who intended to harm you and I tried various sorts of things to wipe him cleanly and destroy him and stop his plan to rule the planet with extremely malevolent dystopian barbaric evil, and I might fail. This is quite embarrassing, that I, Zulfikar Moinuddin Ahmed, would have such a massive failure and let my Beloved People, the Human Race down. These little nation states, including my adopted home, America, are too primitive and stupid to understand the grave danger posed by this Malevolent Evil Bill Gates and cannot do their simplest job of securing Natural Rights and wiping him off from existence.

I do have some excuses. At least this second time I have been born on Earth, I was squeamish about blood and got shot around 1986 or 1985 and then moved to America, and so I do have that sort of excuse, but I am starting to realise that you will not in the end forgive me at all that when I finally find the great evil that darkens the future that I do not pro-actively kill Bill Gates. It's my job, after all. What will these fools in Washington really accomplish? They are not Zulf. They will putz around and let Bill Gates destroy the future of Human Race and not take responsibility.

---

*Date:* June 27, 2021.

I have to think about how to cajole these morons to do the right thing, which is not easy. They are dumb as doorknobs. They actually think Bill Gates is a "philanthropist" with benevolent intentions. Ha ha. Hahahahahahahahaha. Stupid fucks.
