

**RELIANCE ON META FOR ELEMENTARY THINGS LIKE
EMPLOYMENT OFFERS AND EMAILS WILL END WITH BILL
GATES RULING THE WORLD**

ZULFIKAR MOINUDDIN AHMED

UN Security Council, why would you tie employment offers and management to all manner of meta? This is extremely dangerous and you have had weeks that I asked for a simple email for employment and you did not deliver. Bill Gates is chaotic and wilfull and has all manner of unorthodox destructive meta and can disrupt simple processes for you for indefinite times.

Why don't you change your policy and allow ordinary behaviour without meta? Why not just give me a job offer and handle money \$620 mn without making these things vulnerable to Bill Gates problems? Just use ordinary email and paperwork.

I simply do not understand why organisations like you would rely on meta for simple things and then make yourselves vulnerable to every risk of disruption of processes. It seems extremely dumb to me. Why don't you change this way of doing things?
