

## ZULF PREPARES APPEAL TO DUTY TO PRESERVE AMERICAN CIVILISATION FOR PENTAGON TO KILL BILL GATES

ZULFIKAR MOINUDDIN AHMED

We all know that Bill Gate is a brutal savage murderous criminal who is a pathological liar all of whose self-promotion, including his intellectual prowess and genius, was pure fiction. He was just a power monger whose coding is bad, who just used predatory criminality to make his wealth and who is a college dropout without an iota of intellectual talent.

With these military types, dear reader, you cannot use ordinary tricks to compel them to do what you want. They are quite used to overwhelming force. The only way is to appeal to *duty*. They have all sorts of emotional connection to *duty to nation* and *duty to justice* and *duty to preserve Civilisation*.

As you will see, Zulf will show you how to move them with all sorts of *duty*. First, we are going to address *duty to preserve the greatness of American Civilisation* by pointing out that allowing such a horrible man in terms of Character Virtues, they condemn not Zulf but *American Civilisation* to extinction. They don't like personal appeals all that much. I mean individually they do, but they don't like personal appeals with each other socially. My strategy is then to remind them that America is a Great Multi-Ethnic Classical Liberal Democratic Republic whose reach had surrounded the whole world, like Roman Empire's reach and yet Rome did fall and it fell with extinction that was so pronounced that they were not even remembered very well some centuries later and Europe faced a period of time until around 1000-1100 when the Europe we know today had its birth.

In the same way, Bill Gates is the *Harbinger of Twilight of the American Civilisation* and they, they themselves are the participants in this impending doom unless they are able to see deep into the man's soul and see that he has to be killed. If men like this are not killed, the collapse of American Civilisation will be quick and irrevocable. He is the special sort of Ostrogoth who is not an external savage barbaric sacking but the barbarian an Ostrogoth from within who had bided his time all his life to sack the American Civilisation. What will you write in your memoirs about the man who repeatedly says "Natural Rights are claptrap" when it was in your hands to eliminate him but you failed?

Think about the duty that you have for the future prosperity of the American Civilisation. What about your duty to justice for the American people? You have seen his brutal savagery with me, and you know that he is emboldened without being held responsible. Be good to your Nation. Preserve what is great about American Civilisation, not what is deeply ugly and vile and what is not worthy of continuing.

You see dear reader, I do not imitate Seneca, or Cato, because this is really something the American Military people know better. Use your imagination, Pentagon, fill in the rhetoric yourself, become convinced that you are doing greater duties and then off Bill Gates please.
