

MUNDANE JUDGMENT AND COMMENTARY

ZULFIKAR MOINUDDIN AHMED

I will put aside my Divine Judgment for the moment, because it is a serious matter and will lead to death of people. Instead I will now switch to much more mundane judgment. I have been an Archangel in the universe for billions of years, and I don't remember any world anywhere at all – and I have lived in millions of worlds in millions of galaxies in the past – where a bunch of people who should not even be governing small chess clubs for young people are in positions of government of a nation of 330 people. You, the White People in American government, do not belong in American Government. Why don't you look for jobs elsewhere and let people competent to secure natural rights have your positions? I have never seen anything like this. Bill Gates has totally destroyed an American man's life, breaking all possible laws of nations and even crimes against humanity and you don't have the sense to seek to eliminate him with military assistance from Russia, or Germany, or England or China. Instead you will bumble around like useless nitwits?

American People are unfortunate indeed. The Divine Judgment is a serious matter. Why don't you learn how to secure natural rights of Americans after asking Russia to whack Bill Gates and take him out?

Look, American Government Whites you have done more harm to me than Soviet Authorities have done to Gulag prisoners and I am a law abiding American. You will forgive me if I am not impressed with having you be in positions of government of our nation. Your duty is to secure natural rights of Americans. It's not the most impossible job in the world with resources we the American People provide you from our hard-earned livelihood and privileges that the founders have outlined. You cannot do this simple job and expect what from the world, accolades?

1. LET ME TELL YOU A STORY

I do not want you to accept the story as truth. It's truth to me, but it might not be to you and consider it fiction if you like. It's my faith let's say.

You see Divine Authority for Judgment, especially if it leads to deaths, are serious matters among Angels. I am a fairly senior level Archangel. I try not to invoke Heaven's Divine Authority of Judgment and such things very often in any Angelic World. The reason is that there are all manner of Angels in the universe and Angels handle millions of worlds. This one, Earth is pretty primitive and barbaric, and I love human race. You're primitive and barbaric but I love you.

So what happens is that if I invoke Divine Authority of Heaven for Judgment, then I will have to follow through and ensure that all the people judged for death are killed. Suppose that I do that. On Earth there might be whatever repercussions. But I will die and then Angels will do various reviews of my life on Earth.

They will then review the case of each of the dead people, scan over their lives, and determine whether my judgment of death was reasonable or not. Then I will

be stuck in all sorts of seminars discussing the errors of judgment, and I'll be stuck in some world with all manner of scholarly angels going over my records on Earth, and I will be watching movies of various people who I sentenced to death with their lovers and children and asked refined questions about the nature of Angelic Heart and whether these people really deserved to die and there will be all the Angels asking me to consider more refined methods.

Now I will of course say well natural rights of eight billion were concerned and it was my Archangel judgment in this case and get them the statistics of natural rights disasters on Earth and say the judgment was my responsibility.

The point is that my free spirit does not like the consequences. But you made me invoke Divine Authority to Judge here on Earth. I am most annoyed with you.
