DIFFERENCE BETWEEN MY GREAT COURAGE AND BILL GATES' HUBRIS AND EVIL MALEVOLENCE

ZULFIKAR MOINUDDIN AHMED

I, Zulfikar Moinuddin Ahmed, immortal genius who had dedicated to the victims of Hiroshima and Nagasaki atomic bombing my great theoretical physics models, the Four-Sphere Theory, achieved by my own efforts over a period of a decade without any support or funding from any university or any government or industrial organisation, which surpasses the physics genius of Albert Einstein, of Erwin Schroedinger, of Georges Lemaitre to give my Beloved People the Final Laws of Macroscopic Nature down to $10^{-13}cm$, have obviously contributed to my country America infinitely more than the paltry things of Bill Gates, who is a power-hungry malevolent avaricious charlatan. As my conviction developed from 2008 on Four-Sphere Theory in a loft of Williamsburg Brooklyn, I did not get any assistance from anyone at all, and I, Zulfikar Moinuddin Ahmed, who sat beneath the Walls of Union Square and walked amongst the lowest of the dead, who has walked in deep underground prisons of New York with my ankles in metal chains for sleeping in the evening in park benches. I, Zulfikar Moinuddin Ahmed, who has seen to the furthest reaches of the universe and brought back the bounds of existence, who has provided the only correct law of electromagnetism that governs all of existence, who has given the path to resolution of previously intractable problems of protein folding, who has dedicated years of my life to seeking the path to reduction of suffering among my Beloved People, who has cast aside primitive and barbaric racial theories that divide and produce strife among my Beloved people the human race, who has empirically discovered the bounds on ethnicity effects on human moral nature, who has discovered the characterisation of Human Nature as concentration in the 24 variables of Park-Peterson-Seligman, who has give Man the path to first formation of life on Earth, who has bounded human diversity to tractable 5-20 trillion rather than $2^{6\times10^{6}}$, all this and much more I have done am no subordinate to the malevolent worthless criminal Bill Gates who had broken the laws of the state to deny my legitimate compensation for Medium Frequency Strategy, *my strategy and sale* traded by D. E. Shaw & Co. It is totally absurd that I, an immortal genius with my own plans for Pursuit of Happiness and American Dream will ever be subordinate to such a criminal as Bill Gates. I am a thousand times superior to him; I was never a psychopath who cut up eyes of people while pretending to be a saint in false self-promoting propaganda.

United States of America ought to relentlessly bomb Bill Gates and totally obliterate him physically and massacre him. Such a worthless morally degenerate man who is intent on anti-American plots to take control of the United States Military and snuff out Natural Rights of non-white people based on delusional fantasies about racial superiority of himself over others cannot be tolerated by the American people who are 40 percent non-white today.

1. My Character Strengths According to Martin Seligman's Questionnaire

(1) Love (Humanity)
(2) Creativity (Wisdom)
(3) Honesty (Courage)
(4) Curiosity (Wisdom)
(5) Spirituality (Transcendence)
(6) Hope (Transcendence)
(7) Bravery (Courage)
(8) Humour (Transcendence)
(9) Forgiveness (Temperance)
(10) Perspective (Wisdom)

It is interesting to compare this with the ranking of virtues for national averages.

Now 'love' as top ranked virtue is exotic from national averages. In Iceland it is rank 2; in China and Mexico 4; in Israel 5, and the rest has 6+.

Creativity is 1 in Vanuatu; 3 in Hungary and Czech Republic; 5 in Central African Republic; 7 in Italy and France.

Honesty. It's ranked 2 in Turkey and Nigeria; 4 in Nicaragua and Portugal.

Curiosity. Ranked 1 in New Zealand, Netherlands, Denmark, Switzerland, Argentina, Japan, Norway, Israel, Cayman, Czech Republic.

Spirituality. Almost every country has 'religiousness' close to bottom rank 24.

Hope. Mine is 6. It's ranked low almost everywhere except Bahrain and China, 11 and 15.

Bravery. Mine is 7. Sweden, Norway, Netherlands has it 12-15 but most others rank it much lower.

Humour. Mine is 8. In Hungary it is 9, Taiwan 12.

Forgiveness. Mine is 9. In Poland it is 12.

Perspective. Mine is 10. Canada's is 10, and this is more normal, there are many with 11, 12.

This is quite interesting because I now see that no national average will be close to my rankings.

Let me think about this a bit and maybe I can devise a distance on rankings that is valuable.

2. Ranked Distance of Character vectors

I introduce here a simple but I expect quite potent distance d on $\mathbf{R}^{24}$ defined as follows.

We let

$$w_r = e^r / (\sum_{r=0}^{23} e^r)$$

For $x^s = (x_1^s, \ldots, x_{24}^s) \in \mathbf{R}^{24}$ we consider the ordering to be $o(x^s)$. Then we let

$$w(x^s, x^t) = \frac{1}{2}(w_{o(x^s)} + w_{o(x^t)})$$

This is the average weight from the orderings of x^s, x^t. Then define

$$d(x^s, x^t)^2 = \sum_{r=1}^{24} w(x^s, x^t)_r (x_r^s - x_r^t)^2$$

This is a beautiful distance function that reduces the weights of elements based on order of both.

This is the right distance between character strength vectors.
